

Installation Instruction Sheet

Linear Fixtures

INSTALLATION INSTRUCTIONS FOR JOINING AND SUSPENDING FIXTURES

1. Suspend the INITIAL unit from both cables and feed through power cord as typically done.
2. Suspend one of the other CENTRO 2.0 fixtures at each hub interface attaching by 1/4-20x 1.5" screw and two 10-24 socket head screws
3. After leveling fixture to desired height, excess aircraft cable can be snipped off at pivot connector gripper's side exit.
